Forecast for Saturday 25 May 2024

Weather: Low cloud in early hours breaking up towards morning. Then a bright and mainly dry day with some good sunny spells. Cloud building up somewhat, bringing the small chance of a light shower but most staying dry with further sunshine at times. In the evening cloud then increasing more generally with outbreaks of rain from mid evening, with perhaps a few heavier pulses.

Chance of cloud-free hill tops above 800m: 30% in early hours improving 80% soon after dawn then more than 90%, falling 60% from mid evening.

Low cloud and visibility: Extensive cloud at 450-600m in early hours breaking up leaving some summit patches to start the day, these lifting off the peaks during the morning. Bases lowering during the evening to affect higher peaks above 750m from mid evening. Daytime visibility good, some evening deteriorations in any heavier outbreaks of rain.
